### **LETTER OF RECOMMENDATION**

To Whom It May Concern:

It gives me immense pleasure in recommending **SRI VENKATA KOUSIK RAJA MUKKAVALLI** for the graduate program at your University. I have known him since the time he was a sophomore and have taught him the courses “Semiconductor devices and circuits” and “Antennas and Wave Propagation”.

Kousik exhibits a high degree of initiative in continuously striving to update his knowledge. He tries to ensure that his concepts on various topics are very clear and therefore, he is an active participant in classroom. He is regular in completing his assignments, and his assignments are among the best in the class. He has exceptional presentation skills, which were displayed during his comprehensive and extremely good seminar on ‘Nanoscale Magneto Inductive Communication’.

Kousik has a desire to know the unknown and spending numerous hours in the laboratories was the base for his experiential project. He is an excellent team player, his leadership skills have been brought to the fore during his project work on ‘PRINTED BOARD CIRCUIT ASSEMBLY PROCESS’ which he presented with great passion and zest. He had also presented technical seminars in various educational institutions and won in National Level Technical Symposiums.

As a student, Kousik has never been content with mere class work but also involved in various departmental activities. He has been part of various co-curricular activities; He is Core Member of ACME, a club of our department to promote Multi-dimensional skill development among students. He is a pleasant and well-mannered individual with high moral and social values, which can be judged by his diligent participation in various philanthropic activities.

Kousik is capable of coping with a lot of hard work, which is essential for higher academic attainments and this, along with his superior intellectual ability, depth of knowledge in Applied sciences, his enthusiasm to know the unknown, self-initiative nature, sense of responsibility and perseverance place him among top 2% students I have seen over the years. He has all the ingredients to become a successful researcher. I recommend him strongly for admission in your department for graduate study with possible financial assistance.
